

Fingerprint Access Control Time Attendance Unit (1000 User)

The Unit can be used by up to 1000 different users and utilises PIN code or Fingerprint Scanning technology to identify and authorise entry into a premises. The unit Time/Attendance software (supplied with the unit) is a powerful tool for full reporting of employee time keeping and attendance. Network access allows you to access the unit remotely to retrieve Time/Attendance information. The unit also features door release connections for authorised visitors and together with fingerprint identification, access into a premises can be securely controlled and recorded.

- Biometric Fingerprint authorisation for access control and Time/Attendance
- Up to 1000 users
- Password feature provides each user with a unique PIN code to use instead of a fingerprint
- For maximum reliability, each fingerprint is programmed directly into the unit
- 3 scans per fingerprint are taken to increase accuracy
